Kestrel Ridge Analytics

Security Whitepaper 2026 | Document ref KR-DOC-4410

1. Overview

Kestrel Ridge Analytics provides a customer analytics platform for retail and fintech brands. Customers share loyalty, transaction and engagement data with us through a secure upload or API, and we return segments, churn scores and campaign insights. This paper summarises how we protect that data.

2. Data protection

Customer data is encrypted at rest with AES-256 and in transit with TLS 1.2 or later. Encryption keys are managed in our cloud provider's key management service and rotated annually.

3. Access control

Production access requires single sign-on with hardware security keys. Access is reviewed quarterly and removed within one working day when staff change roles or leave.
